

SATHYA SREE N

Business Analyst | Requirements Management & Process Improvement | Team Leadership

+91 7339180443 | nsathyasree96@gmail.com | [linkedin.com/in/sathya-sree-nerinjil](https://www.linkedin.com/in/sathya-sree-nerinjil)

PROFESSIONAL SUMMARY

Business Analyst and Team Lead with 9 years of experience spanning production engineering and end-to-end requirements delivery for large enterprise platforms. Bridge business stakeholders and technology teams by eliciting requirements and translating them into functional specifications, process flows, use cases, and user stories that ensure software and systems align with business needs. Skilled in solution design — proposing practical, technically sound fixes for complex, rules-driven operational workflows. Directed cross-functional teams across onshore and offshore locations within Agile/SDLC frameworks, reduced rework by 30% through structured stakeholder workshops, and built full BA documentation packages through reverse engineering when no source material existed. Proficient in MS SQL Server, SSIS, SSRS, and ArangoDB, with strong data fluency across relational and NoSQL databases.

CORE COMPETENCIES

Requirement Elicitation & Functional Specifications • Process Flows, Use Cases & User Stories • Solution Design
Project Scope, Planning & Estimation • SDLC & Agile/Scrum • System Testing, UAT & Validation
Complex Business Rule Logic Design • Regulatory & Compliance Reporting • Executive Dashboard Requirements
Data Migration & Reverse Engineering • ETL: SSIS & SSRS • MS SQL Server & PL/SQL • NoSQL Database Design • Stakeholder Management

PROFESSIONAL EXPERIENCE

Business Analyst & Team Lead | Accenture Solutions Pvt. Ltd.

Sep 2019 – Present

Enterprise Data Platform | Regulatory Compliance, Quality Reporting, Stakeholder Outreach | React & Node.js Migration

- Owned end-to-end requirements for a compliance-driven data platform handling multiple categories of structured regulatory file submissions, ensuring developed software and systems aligned fully with governing standards and client compliance obligations.
- Designed and proposed solutions for complex business rule logic — including multi-condition combination mapping, UI override mechanics, and downstream scoring impact — enabling end users to accurately resolve multi-variable cases within a structured review workflow.
- Authored functional specifications, process flows, use cases, and user stories for an executive reporting suite delivering engagement KPIs, revenue projections, retrieval metrics, and quality ratings to operational and executive leadership.
- Reverse-engineered a legacy .NET and SQL Server application with zero existing documentation, independently rebuilding the complete BA specification package — including process flows, user stories, data flow diagrams, and acceptance criteria — to enable a React/Node.js migration.
- Facilitated cross-functional requirement workshops with onshore stakeholders, reducing rework cycles by approximately 30% through improved requirement clarity.
- Collaborated with project managers on project scope, objectives, and deliverables, supporting project planning and estimation using JIRA across a distributed onshore/offshore team, sustaining 95% on-time delivery adherence.
- Monitored project progress against plan, identifying risks and deviations early; directed the automation team and managed production support rotations, achieving 98% SLA adherence through structured shift scheduling and root cause analysis.
- Drove team capability development, achieving 100% quarterly certification completion across 50+ team members for FY24 Q4 and FY25 Q1.
- Participated in system testing, regression testing, and user acceptance testing (UAT), validating that implemented solutions met specified requirements; identified complex review-logic edge cases missed during QA.

- Maintained 99.9% uptime for a .NET-based document processing and file intake application supporting enterprise outreach operations.
- Optimized SQL stored procedures, queries, and triggers for high-volume data processing, improving data retrieval speed by 30% through query tuning and indexing.
- Built SSIS ETL pipelines and SSRS reports that automated manual reporting workflows, cutting manual effort by 40% and improving downstream data accuracy.
- Led the end-to-end relational-to-NoSQL migration — covering schema mapping, data integrity validation, and performance benchmarking — delivering a 25% query performance improvement with 99.9% data accuracy.
- Maintained 98% SLA compliance by performing root cause analysis on P1/P2 production incidents and implementing preventive fixes to reduce recurrence.

TECHNICAL SKILLS

BA Methods: Requirement Elicitation, Functional Specifications, Process Flow Mapping, Use Case & User Story Documentation, Solution Design, BRD/FRD Authoring

Project & Delivery: SDLC, Agile & Scrum, Project Scope & Planning, Estimation (JIRA), Risk Monitoring, System Testing, UAT & Validation

Domain: Regulatory & Compliance Reporting, Quality Ratings & Scoring Models, Complex Business Rule Logic, Structured File Processing, Stakeholder Outreach

Databases: MS SQL Server, PL/SQL (Oracle), ArangoDB, MongoDB (SI Associate Certified)

ETL / Reporting: SSIS, SSRS, Executive Dashboard Requirements, Power BI (Familiarity)

Cloud / Tools: Microsoft Azure (AZ-900), Databricks (Read Access), JIRA, Trello, Confluence, MS Office, Zoho CRM

CERTIFICATIONS

Certified Scrum Product Owner (CSPO)

AHM-250 – Healthcare Management (AHIP – Healthcare Insurance Fundamentals)

CBAP – In Progress (IIBA)

Microsoft Azure Fundamentals (AZ-900)

ArangoDB Certified Professional

MongoDB SI Associate

EDUCATION

B.E. – Electrical and Electronics Engineering

Government College of Engineering, Salem | GPA: 8.9 / 10 | Graduated April 2017

Academic Second Rank Holder

HSC Grade – Tamil Nadu State Board

Velammal School of Excellence, Surapet | 94.6%

SSLC Grade – CBSE

SKNSPMC Vivekananda Vidyalaya, Perambur | 9.6 CGPA | 91.2%

NOTABLE ACHIEVEMENTS

- Reverse-engineered a legacy .NET and SQL system with zero original documentation, delivering a complete BA package that enabled a full React/Node.js migration.
- Achieved 100% quarterly certification target completion across 50+ team members for FY24 Q4 and FY25 Q1.
- Led a relational-to-NoSQL database migration, delivering a 25% improvement in query performance with 99.9% data accuracy.
- Reduced production incidents by 30% through structured root cause analysis and preventive SLA management.
