

SATHYA SREE N

Healthcare Data Business Analyst | Risk Adjustment & HEDIS | US Payer Domain

+91 7339180443 | nsathyasree96@gmail.com | [linkedin.com/in/sathya-sree-nerinjil](https://www.linkedin.com/in/sathya-sree-nerinjil)

PROFESSIONAL SUMMARY

Healthcare-focused Business Analyst and Team Lead with 9 years of experience at Accenture, spanning production engineering and end-to-end requirements delivery for US payer platforms. Bridge business stakeholders and technology teams by eliciting requirements and translating them into functional specifications, process flows, use cases, and user stories that ensure software and systems align with business needs. Delivered Risk Adjustment, HEDIS, and CMS-compliant reporting solutions through structured solution design, proposing practical fixes for complex regulatory and clinical workflows. Directed cross-functional teams across onshore and offshore locations within Agile/SDLC frameworks, reduced rework by 30% through structured stakeholder workshops, and built full BA documentation packages through reverse engineering when no source material existed. Proficient in MS SQL Server, SSIS, SSRS, and ArangoDB, with hands-on ownership of CMS regulatory files including 837, MMR, MOR, and MAO-004.

CORE COMPETENCIES

Risk Adjustment (RA) Workflows • HCC Coding & Combo Code Logic • HEDIS & Star Ratings • CMS Regulatory Files: 837, MMR, MOR, MAO-004
Requirement Elicitation & Functional Specifications • Process Flows, Use Cases & User Stories • Solution Design
Project Scope, Planning & Estimation • SDLC & Agile/Scrum • System Testing, UAT & Validation
Data Migration & Reverse Engineering • ETL: SSIS & SSRS • MS SQL Server & PL/SQL • ArangoDB & NoSQL • Stakeholder Management

PROFESSIONAL EXPERIENCE

Business Analyst & Team Lead | Accenture Solutions Pvt. Ltd.

Sep 2019 – Present

US Healthcare Payer Platform | Risk Adjustment, HEDIS, Provider Outreach | React & Node.js Migration

- Owned end-to-end requirements for a Risk Adjustment platform processing CMS regulatory files — including 837 professional/institutional claims, MMRs, MORs, and MAO-004 encounter submissions — ensuring developed software and systems aligned fully with CMS guidelines and client compliance obligations.
- Designed and proposed solutions for HCC Combo Code logic covering ICD-10-CM combination mapping, UI override mechanics, and downstream scoring impact, enabling coders to accurately resolve complex diagnoses within the chart review workflow.
- Authored functional specifications, process flows, use cases, and user stories for a D3 reporting suite delivering provider and member engagement KPIs, Risk Score revenue projections, chart retrieval metrics, and HEDIS Star Ratings to clinical and operations leadership.
- Reverse-engineered a legacy .NET and SQL Server application with zero existing documentation, independently rebuilding the complete BA specification package — including process flows, user stories, data flow diagrams, and acceptance criteria — to enable a React/Node.js migration.
- Facilitated cross-functional requirement workshops with US onshore stakeholders, reducing rework cycles by approximately 30% through improved requirement clarity.
- Collaborated with project managers on project scope, objectives, and deliverables, supporting project planning and estimation using JIRA across a distributed onshore/offshore team, sustaining 95% on-time delivery adherence.
- Monitored project progress against plan, identifying risks and deviations early; directed the automation team and managed production support rotations, achieving 98% SLA adherence through structured shift scheduling and root cause analysis.
- Drove team capability development, achieving 100% quarterly certification completion across 50+ team members for FY24 Q4 and FY25 Q1.
- Participated in system testing, regression testing, and user acceptance testing (UAT), validating that implemented solutions met specified requirements; identified encounter-level chart review edge cases missed during QA.

- Maintained 99.9% uptime for a .NET-based document processing and file intake application supporting US healthcare provider outreach operations.
- Optimized SQL stored procedures, queries, and triggers for high-volume data processing, improving data retrieval speed by 30% through query tuning and indexing.
- Built SSIS ETL pipelines and SSRS reports that automated manual reporting workflows, cutting manual effort by 40% and improving downstream data accuracy.
- Led the end-to-end MS SQL to ArangoDB migration — covering schema mapping, data integrity validation, and performance benchmarking — delivering a 25% query performance improvement with 99.9% data accuracy.
- Maintained 98% SLA compliance by performing root cause analysis on P1/P2 production incidents and implementing preventive fixes to reduce recurrence.

TECHNICAL SKILLS

Domain: Risk Adjustment (RA), HEDIS & Star Ratings, HCC Coding, CMS Regulatory Files (837, MMR, MOR, MAO-004), Provider Outreach, Chart Review

BA Methods: Requirement Elicitation, Functional Specifications, Process Flow Mapping, Use Case & User Story Documentation, Solution Design

Project & Delivery: SDLC, Agile & Scrum, Project Scope & Planning, Estimation (JIRA), Risk Monitoring, System Testing, UAT & Validation

Databases: MS SQL Server, PL/SQL (Oracle), ArangoDB, MongoDB (SI Associate Certified)

ETL / Reporting: SSIS, SSRS, D3 Dashboard Requirements, Power BI (Familiarity)

Cloud / Tools: Microsoft Azure (AZ-900), Databricks (Read Access), JIRA, Trello, Confluence, MS Office, Zoho CRM

CERTIFICATIONS

Certified Scrum Product Owner (CSPO)

AHM-250 – Healthcare Management (AHIP – Healthcare Insurance Fundamentals)

CBAP – In Progress (IIBA)

Microsoft Azure Fundamentals (AZ-900)

ArangoDB Certified Professional

MongoDB SI Associate

EDUCATION

B.E. – Electrical and Electronics Engineering

Government College of Engineering, Salem | GPA: 8.9 / 10 | Graduated April 2017

Academic Second Rank Holder

HSC Grade – Tamil Nadu State Board

Velammal School of Excellence, Surapet | 94.6%

SSLC Grade – CBSE

SKNSPMC Vivekananda Vidyalaya, Perambur | 9.6 CGPA | 91.2%

NOTABLE ACHIEVEMENTS

- Reverse-engineered a legacy .NET and SQL system with zero original documentation, delivering a complete BA package that enabled a full React/Node.js migration.
- Achieved 100% quarterly certification target completion across 50+ team members for FY24 Q4 and FY25 Q1.
- Led the MS SQL to ArangoDB migration, delivering a 25% improvement in query performance with 99.9% data accuracy.
- Reduced production incidents by 30% through structured root cause analysis and preventive SLA management.
